

Features and Benefits

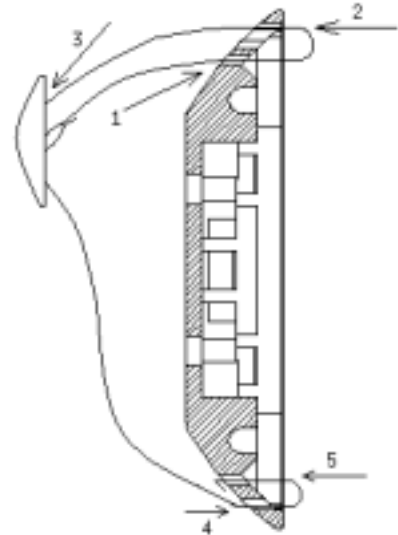

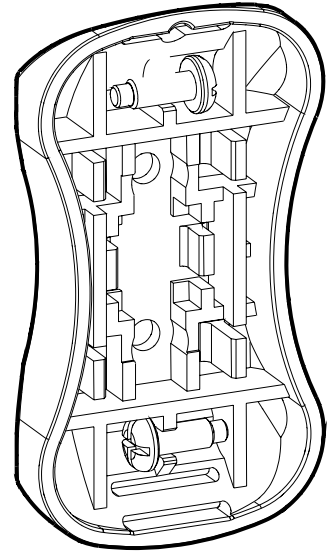

The Punch-Down-Terminating Puck is a handy and versatile twisted pair termination aid. Any Molex Premise Networks RJ-45 (including DataGate™ and shielded options) or USO II module may be firmly held within the puck while punch-down-termination is performed. The punch-down puck is held securely to the palm of the hand by an adjustable elastic strap. Alternatively, the punch-down-terminating puck can be held against any secure flat service or can be positively secured into place with two supplied screws.

- One Punch-Down-Terminating Puck
- One adjustable Strap
- Two Fixing Screws (to optionally attach the punchdown-terminating puck to a flat service)

Technical Information

Dimensions:
4.0" H x 2.21" W x .74" D

Shipping Weight:
2.0 oz
