

Features and Benefits

Kits demonstrate the features and benefits of the MIIM solution across the end-to-end channel on a fully-functional network. Users may change patching or connected end devices to demonstrate MIIM's physical layer monitoring and management capability.

Kits are also excellent troubleshooting systems to replicate any site issues in a controllable network environment.

- Available in Category 6 copper, LC fiber, or combination copper and fiber
- Copper panels are pre-terminated
- Customer supplies server, router, and switch
- Cable in kit are PVC and may not meet local building codes
- Channels constructed in class will not comply with TIA standard
