Allied Telesis

x530L Series

Stackable Intelligent Layer 3 Switches

The Allied Telesis x530L Series stackable Layer 3 switches feature high capacity, resiliency and easy management. With both Multi-Gigabit and high port density models, they are the ideal choice for network access applications.

AMF *AMF-Sec* *ACTIVE* Fiber Monitoring *EPSRing*

OpenFlow CONFORMANT BASIC V1.3

VCStack *VCStack LD*

AT-VISTA MANAGER EX AlliedWare Plus OPERATING SYSTEM

Overview

The Allied Telesis x530L Series are a high-performing and feature-rich choice for today's networks. The x530L-10GHXm features 8 x 100M/1/2.5/5G Multi-Gigabit ports with 2 x 10 Gigabit uplinks, while 28 and 52 port models feature 24 or 48 x 10M/100M/1 Gigabit ports with 4 x 10 Gigabit uplinks. The ability to stack multiple units, enables a versatile solution for enterprise applications.

The x530L-10GHXm supports PoE++ (up to 90W per port), while 28 or 52 port GPX models support PoE+ (up to 30W per port), making them perfect for connecting and powering devices at the network edge such as wireless access points, and IP surveillance cameras.

Network Management

Vista Manager™ EX bundled with Allied Telesis Autonomous Management Framework™ (AMF) meets the increasing management requirements of modern networks. While AMF allows an entire network to be securely and easily managed as a single virtual device, Vista Manager EX provides an intuitive and powerful graphical tool for monitoring and managing AMF wired, Autonomous Wave Control (AWC) wireless, and third party (SNMP) devices.

Cybersecurity

The x530L Series acting as an AMF member is compatible with our AMF-Security solution, which enables a self-defending network. The AMF–Sec controller responds immediately to any internal malware threats by instructing the x530L to isolate the affected part of the network, and quarantine the suspect device. Vista Manager EX alerts networks administrators of threats that have been dealt with.

Resilient

Today's converging online services mean there is increasing demand for highly-available networks with minimal downtime. Allied Telesis Virtual Chassis Stacking (VCStack™), in conjunction with link aggregation, provides a network with no single point of failure and application resiliency.

x530L Series switches can form a VCStack of up to eight units for enhanced resiliency and simplified management. Mixed stacking allows the x530L Series to stack with x530 Series Switches. Stacking over Long Distance (VCStack™ LD), which enables stacks to be created over long distance fiber links, makes the x530L Series the perfect choice for distributed environments too.

Allied Telesis Ethernet Protection Switched Ring (EPSRing™), and the standards-based G.8032 Ethernet Ring Protection, ensure that distributed network segments have high-speed, resilient access to online resources and applications.

Reliable

The x530L Series was designed with reliability in mind, and guarantees continual delivery of essential services. The 28 and 52 port models feature dual built-in power supplies, and all models have near-hitless online stack reconfiguration, so maintenance does not affect network uptime.

Secure

A secure network environment is guaranteed. The x530L Series offers powerful control over network traffic types, secure management options, loop guard to protect against cabling mistakes, and tri-authentication for comprehensive access control.

High-speed wireless

The x530L-10GHXm provides support for both 2.5 and 5 Gigabit connectivity, allowing high-speed wireless to run at full capacity while

avoiding the need to upgrade existing Cat5e/Cat6 cables.

Future proof

Ensure a future-proof network, with superior flexibility and the ability to stack multiple units. All x530L models feature 10 Gigabit uplink ports and a comprehensive IPv6 feature set, so are ready for future network traffic demands.

Environmentally friendly

The x530L Series supports Energy Efficient Ethernet (EEE), automatically reducing the power consumed by the switch whenever there is no traffic on a port. This sophisticated feature significantly lowers operating costs by reducing the power requirements of the switch and any associated cooling equipment.

Key Features

▶ Autonomous Management Framework™ (AMF)

▶ Vista Manager EX compatible

▶ AMF-Security compatible

▶ VCStack™ up to 8 switches

▶ VCStack LD for distributed resilient backbones

▶ EPSR™ and G.8032 Ethernet Ring Protection for resilient rings

▶ EPSR Master

▶ Up to 740W PoE+ power (28 and 52 port models)

▶ Up to 90W PoE++ per port (x530L-10GHXm)

▶ Continuous PoE

▶ Multi-Gigabit (100M/1G/2.5G/5G) (x530L-10GHXm)

▶ Active Fiber Monitoring (AFM)

▶ OpenFlow for SDN

▶ VLAN Translation

Key Features

Autonomous Management Framework™ (AMF)

▶ AMF is a sophisticated suite of management tools that provide a simplified approach to network management. Powerful features like centralized management, auto-backup, auto-upgrade, auto-provisioning and auto-recovery enable plug-and-play networking and zero-touch management.

▶ Any x530L Series switch can operate as the AMF network master, storing firmware and configuration backups for other network nodes. The AMF master enables auto-provisioning and auto-upgrade by providing appropriate files to new network members. New network devices can be pre-provisioned, making installation easy because no onsite configuration is required.

▶ AMF Guestnode allows Allied Telesis wireless APs and other switching products, as well as third-party devices such as IP phones and security cameras, to be part of an AMF network.

Virtual Chassis Stacking (VCStack™)

▶ Create a VCStack of up to 8 units with 40Gbps of stacking bandwidth for each unit. Stacking links are connected in a ring so each device has dual connections to further improve resiliency. VCStack provides a highly-available system where network resources are spread out across stacked units, reducing the impact if one of the units fails. Aggregating switch ports on different units across the stack provides excellent network resiliency.

▶ Mixed stacking allows the x530L Series to stack with x530 Series switches, providing flexible deployment options.

Long-Distance Stacking (VCStack™ LD)

▶ VCStack LD allows a VCStack to be created over longer distances, perfect for distributed network environments.

Ethernet Protection Switched Ring (EPSRing™)

▶ EPSRing and 10 Gigabit Ethernet allow several x530L Series switches to form high-speed protected rings capable of recovery within as little as 50ms. This feature is perfect for high performance and high availability in enterprise networks.

▶ Super-Loop Protection (SLP) enables a link between two EPSR nodes to be in separate EPSR domains, improving redundancy and network fault resiliency.

▶ The x530L Series switches can act as the ESPR Master, or be deployed as EPSR transit nodes, in a high-speed ring.

G.8032 Ethernet Ring Protection

▶ G.8032 provides standards-based high-speed ring protection, that can be deployed as stand-alone, or interoperate with Allied Telesis EPSR.

▶ Ethernet Connectivity Fault Monitoring (CFM) proactively monitors links and VLANs, and provides alerts when a fault is detected.

Power over Ethernet (PoE+ and PoE++)

▶ With PoE, a separate power connection to media endpoints such as IP phones and wireless access points is not necessary. PoE reduces costs and provides flexibility, with the x530L 28 and 52 port models supplying up to 30W per port (PoE+) to endpoints.

▶ The x530L 10 port model supports up to 90W per port (PoE++) to connect high power devices such as high resolution PTZ cameras, enhanced infrared lighting and lighting controllers, remote Point of Sale (POS) kiosks, and more.

Continuous PoE

▶ Continuous PoE allows the switch to be restarted without affecting the supply of power to connected devices. Smart lighting, security cameras, and other PoE devices will continue to operate during a software upgrade on the switch.

Active Fiber Monitoring (AFM)

▶ AFM prevents eavesdropping on fiber communications by monitoring received optical power. If an intrusion is detected, the link can be automatically shut down, or an operator alert can be sent.

Multi-Gigabit Ethernet

▶ The IEEE 802.3bz standard (also known as "NBASE-T") allows traffic speeds of greater than 1 Gigabit on legacy Cat5e/Cat6 cable. The x530L 10 port model supports both 2.5 and 5 Gigabit connectivity, allowing high-speed wireless APs to run at full capacity, and building uplinks to be upgraded, without re-cabling.

High Reliability

▶ The x530L Series feature front to back cooling and the 28 and 52 port models have dual PSUs.

Voice VLAN

▶ Voice VLAN automatically separates voice and data traffic into two different VLANs. This automatic separation places delay-sensitive traffic into a voice-dedicated VLAN, which simplifies QoS configurations.

sFlow

▶ sFlow is an industry-standard technology for monitoring high-speed switched networks. It provides complete visibility into network use, enabling performance optimization, usage accounting/billing, and defense against security threats. Sampled packets sent to a collector ensure a real-time view of network traffic.

VLAN Translation

▶ VLAN Translation allows traffic arriving on a VLAN to be mapped to a different VLAN on the outgoing paired interface.

▶ It is common for a network Service Provider (SP) to give each customer their own unique VLAN, yet at the customer location give all customers the same VLAN-ID for tagged packets to use on the wire. SPs can use VLAN Translation to change the tagged packet's VLAN-ID at the customer location to the VLAN-ID for tagged packets to use within the SP's network.

▶ This feature is also useful in Enterprise environments where it can be used to merge two networks together, without manually reconfiguring the VLAN numbering scheme.

VLAN Mirroring (RSPAN)

▶ VLAN mirroring allows traffic from a port on a remote switch to be analyzed locally. Traffic being transmitted or received on the port is duplicated and sent across the network on a special VLAN.

Optical DDM

▶ Most modern optical SFP/SFP+/QSFP transceivers support Digital Diagnostics Monitoring (DDM). This enables real-time monitoring of various parameters of the transceiver, such as optical output power, temperature, laser bias current and transceiver supply voltage. Easy access to this information simplifies diagnosing problems with optical modules and fiber connections.

Tri-authentication

▶ Authentication options on the x530L Series also include alternatives to IEEE 802.1x port-based authentication, such as web authentication to enable guest access and MAC authentication for endpoints that do not have an IEEE 802.1x supplicant. All three authentication methods—IEEE 802.1x, MAC-based and Web-based—can be enabled simultaneously on the same port for tri-authentication.

TACACS+ Command Authorization

▶ TACACS+ Command Authorization offers centralized control over which commands may be issued by each specific AlliedWare Plus device user. It complements authentication and accounting services for a complete AAA solution.

Premium Software License

▶ By default, the x530L Series offers a comprehensive Layer 2 and basic Layer 3 feature set that includes static routing and IPv6 management features. The feature set can easily be elevated to full Layer 3 by applying the premium software license. This adds dynamic routing protocols and Layer 3 multicasting capabilities.

VLAN Access Control List (ACLs)

▶ ACLs simplify access and traffic control across entire segments of the network. They can be applied to a VLAN as well as a specific port.
Dynamic Host Configuration Protocol (DHCP) Snooping

▶ DHCP servers allocate IP addresses to clients, and the switch keeps a record of addresses issued on each port. IP source guard checks against this DHCP snooping database to ensure only clients with specific IP and/or MAC address can access the network. DHCP snooping can be combined with other features, like dynamic ARP inspection, to increase security in Layer 2 switched environments, and also provides a traceable history, which meets the growing legal requirements placed on service providers.

Software Defined Networking (SDN)

▶ OpenFlow is a key technology that enables the use of SDN to build smart applications that unlock value and reduce cost.

Key Solutions

Legend:
- VCStack link
- 10 Gigabit link
- 2.5 or 5 Gigabit link
- 1 Gigabit link
- Link aggregation

Resilient distribution switching

The x530L Series are ideal for distribution solutions, where resiliency and flexibility are required. In the above diagram, distribution switches utilize long-distance Virtual Chassis Stacking (VCStack LD) to create a single virtual unit out of multiple devices. By using fiber stacking connectivity, units can be kilometers apart—perfect for a distributed environment. Mixed stacking allows the x530L Series and x530 Series switches to be stacked together for even more deployment flexibility.

When combined with link aggregation, VCStack provides a solution with no single point of failure, which fully utilizes all network bandwidth.

The x530L Series supports Enterprises and their use of business-critical online resources and applications, with a resilient and reliable distribution solution.

Power at the network edge

The 28 and 52 port PoE+ models can provide 30 Watts of power to endpoints such as wireless access points, security cameras, and IP phones – with dual internal PSUs providing a resilient solution.

The 10 port PoE++ model can provide up to 90 Watts per port, to connect and power today's most advanced devices, such as outdoor PTZ security cameras with heaters and blowers, enhanced lighting management, and more. Multi-Gigabit enables 2.5 or 5 Gigabit connectivity over existing Cat5e/Cat6 cables, to maximize throughout, as well as support low-cost network performance upgrades.

Continuous PoE ensures power delivery to endpoints even during a switch firmware upgrade, while advanced security and access control features make the x530L Series the ideal choice for connecting and powering devices at the network edge.

Specifications

Performance

- ▶ 40Gbps of stacking bandwidth using front panel 10G SFP+ ports
- ▶ Supports 10KB jumbo frames
- ▶ Wirespeed multicasting
- ▶ 4094 configurable VLANs
- ▶ 16K MAC addresses
- ▶ Up to 1250 OpenFlow v1.3 entries
- ▶ 1GB DDR3 SDRAM, 256MB NAND flash memory
- ▶ Packet buffer memory: 3MB

Reliability

- ▶ Modular AlliedWare Plus operating system
- ▶ Full environmental monitoring of PSUs, fans, temperature and internal voltages. SNMP traps alert network managers in case of any failure

Expandability

- ▶ Stack up to eight units in a VCStack
- ▶ Versatile licensing options for additional features

Flexibility and Compatibility

- ▶ 10G SFP+ ports will support any combination of Allied Telesis 1000Mbps SFP and 10GbE SFP+ modules and direct attach cables listed in this document under Ordering Information
- ▶ Port speed and duplex configuration can be set manually or by auto-negotiation
- ▶ Front-panel SFP+ stacking ports can be configured as 1G/10G Ethernet ports

Diagnostic Tools

- ▶ Connectivity Fault Management (CFM) - Continuity Check Protocol (CCP) for use with G.8032 ERPS
- ▶ Built-In Self Test (BIST)
- ▶ Ping polling and TraceRoute for IPv4 and IPv6
- ▶ Optical Digital Diagnostic Monitoring (DDM)
- ▶ Find-me device locator
- ▶ Automatic link flap detection and port shutdown
- ▶ Cable fault locator (TDR)
- ▶ Uni-Directional Link Detection (UDLD)
- ▶ Active Fiber Monitoring detects tampering on optical links
- ▶ Port and VLAN mirroring (RSPAN)

IPv4 Features

- ▶ Equal Cost Multi Path (ECMP) routing
- ▶ Static unicast and multicast routing for IPv4
- ▶ UDP broadcast helper (IP helper)
- ▶ Directed broadcast forwarding
- ▶ Black hole routing
- ▶ DNS relay
- ▶ Policy-based routing
- ▶ Route redistribution (OSPF, RIP, and BGP)

IPv6 Features

- ▶ Device management over IPv6 networks with SNMPv6, Telnetv6 and SSHv6
- ▶ IPv4 and IPv6 dual stack
- ▶ IPv6 over IPv4 tunneling (manual configuration only)
- ▶ Log to IPv6 hosts with Syslog v6
- ▶ NTPv6 client and server
- ▶ DNSv6 client, DNSv6 relay
- ▶ DHCPv6 relay and client
- ▶ Static IPv6 unicast and multicast routing
- ▶ IPv6 aware storm protection and QoS
- ▶ IPv6 hardware ACLs

Management

- ▶ Industry-standard CLI with context-sensitive help
- ▶ Built-in text editor and powerful CLI scripting engine
- ▶ Comprehensive SNMP MIB support for standards-based device management
- ▶ Console management port on the front panel for ease of access
- ▶ Event-based triggers allow user-defined scripts to be executed upon selected system events
- ▶ Eco-friendly mode allows ports and LEDs to be disabled to save power
- ▶ USB interface allows software release files, configurations and other files to be stored for backup and distribution to other devices
- ▶ Front panel 7-segment LED provides at-a-glance status and fault information
- ▶ Autonomous Management Framework (AMF) enables powerful centralized management and zero-touch device installation and recovery. Try AMF for free with the built-in Starter license
- ▶ Web-based Graphical User Interface (GUI)

Quality of Service

- ▶ IP precedence and DiffServ marking based on Layer 2, 3 and 4 headers
- ▶ Queue scheduling options for strict priority, weighted round robin or mixed scheduling
- ▶ Taildrop for queue congestion control
- ▶ Extensive remarking capabilities
- ▶ Policy-based QoS based on VLAN, port, MAC and general packet classifiers
- ▶ Limit bandwidth per port or per traffic class down to 64kbps
- ▶ 8 priority queues with a hierarchy of high priority queues for real time traffic, and mixed scheduling, for each switch port
- ▶ Policy-based storm protection
- ▶ Wirespeed traffic classification with low latency essential for VoIP and real-time streaming media applications

Resiliency Features

- ▶ EPSRing (Ethernet Protection Switched Rings) with SuperLoop Protection (SLP) and enhanced recovery
- ▶ EPSR Master or transit node deployment
- ▶ STP root guard
- ▶ Loop protection: thrash limiting and loop detection
- ▶ Dynamic link failover (host attach)
- ▶ Control Plane Prioritization (CPP) ensures the CPU always has sufficient bandwidth to process network control traffic
- ▶ PVST+ compatibility mode
- ▶ VCStack fast failover minimizes network disruption
- ▶ SFP+ stacking ports can be configured as 10G Ethernet ports
- ▶ Long-Distance VCStack with 10G SFP+ modules (VCStack LD)
- ▶ BPDU forwarding

Security Features

- ▶ MAC address filtering and MAC address lock-down
- ▶ Port-based learn limits (intrusion detection)
- ▶ Access Control Lists (ACLs) based on layer 3 and 4 headers
- ▶ Dynamic ACLs assigned via port authentication
- ▶ ACL Groups enable multiple hosts/ports to be included in a single ACL, reducing configuration
- ▶ Private VLANs provide security and port isolation for multiple customers using the same VLAN
- ▶ Secure Copy (SCP)
- ▶ BPDU protection
- ▶ Network Access and Control (NAC) features manage endpoint security
- ▶ Dynamic VLAN assignment
- ▶ Tri-authentication: MAC-based, web-based and IEEE 802.1x
- ▶ DoS attack blocking and virus throttling
- ▶ DHCP snooping, IP source guard and Dynamic ARP Inspection (DAI)
- ▶ Strong password security and encryption
- ▶ Auth fail and guest VLANs
- ▶ Secure File Transfer Protocol (SFTP) client
- ▶ Authentication, Authorisation and Accounting (AAA)
- ▶ Bootloader can be password protected for device security
- ▶ Configurable ACLs for management traffic
- ▶ RADIUS group selection per VLAN or port

Software Defined Networking (SDN)

- ▶ OpenFlow v1.3 with support for encryption, connection interruption and inactivity probe

Environmental Specifications

- ▶ Operating temperature range: 0°C to 50°C (32°F to 122°F)
- ▶ Storage temperature range: -25°C to 70°C (-13°F to 158°F)
- ▶ Operating relative humidity range: 5% to 90% non-condensing
- ▶ Storage relative humidity range: 5% to 95% non-condensing
- ▶ Operating altitude: 3,048 meters maximum (10,000 ft)

Power Supply Specifications

- ▶ AC voltage: 90-264V (auto-ranging)
- ▶ Frequency: 50-60Hz

Electrical Approvals and Compliances

- ▶ EMC: EN55032 class A, FCC class A, VCCI class A, ICES-003 class A
- ▶ Immunity: EN55024, EN61000-3-levels 2 (Harmonics), and 3 (Flicker) – AC models only

Safety

- ▶ Standards: UL60950-1, CAN/CSA-C22.2 No. 60950-1-03, EN60950-1, EN60825-1, AS/NZS 60950.1
- ▶ Certification: UL, cUL

Restrictions on Hazardous Substances (RoHS) Compliance

- ▶ EU RoHS compliant
- ▶ China RoHS compliant

Standards and Protocols

AlliedWare Plus Operating System

Version 5.5.0-2

Authentication

RFC 1321   MD5 Message-Digest algorithm
RFC 1828   IP authentication using keyed MD5

Border Gateway Protocol (BGP)

BGP dynamic capability
BGP outbound route filtering
RFC 1772   Application of the Border Gateway Protocol (BGP) in the Internet
RFC 1997   BGP communities attribute
RFC 2385   Protection of BGP sessions via the TCP MD5 signature option
RFC 2439   BGP route flap damping
RFC 2858   Multiprotocol extensions for BGP-4
RFC 2918   Route refresh capability for BGP-4
RFC 3392   Capabilities advertisement with BGP-4
RFC 3882   Configuring BGP to block Denial-of-Service (DoS) attacks
RFC 4271   Border Gateway Protocol 4 (BGP-4)
RFC 4360   BGP extended communities
RFC 4456   BGP route reflection - an alternative to full mesh iBGP
RFC 4724   BGP graceful restart
RFC 4893   BGP support for four-octet AS number space
RFC 5065   Autonomous system confederations for BGP

Cryptographic Algorithms

FIPS Approved Algorithms
Encryption (Block Ciphers):
▶ AES (ECB, CBC, CFB and OFB Modes)
▶ 3DES (ECB, CBC, CFB and OFB Modes)
Block Cipher Modes:
▶ CCM
▶ CMAC
▶ GCM
▶ XTS
Digital Signatures & Asymmetric Key Generation:
▶ DSA
▶ ECDSA
▶ RSA
Secure Hashing:
▶ SHA-1
▶ SHA-2 (SHA-224, SHA-256, SHA-384. SHA-512)
Message Authentication:
▶ HMAC (SHA-1, SHA-2(224, 256, 384, 512)
Random Number Generation:
▶ DRBG (Hash, HMAC and Counter)

Non FIPS Approved Algorithms
RNG (AES128/192/256)
DES
MD5

Encryption (management traffic only)

FIPS 180-1   Secure Hash standard (SHA-1)
FIPS 186   Digital signature standard (RSA)
FIPS 46-3   Data Encryption Standard (DES and 3DES)

Ethernet Standards

IEEE 802.2   Logical Link Control (LLC)
IEEE 802.3   Ethernet
IEEE 802.3ab 1000BASE-T
IEEE 802.3ae 10 Gigabit Ethernet
IEEE 802.3af Power over Ethernet (PoE)
IEEE 802.3at Power over Ethernet up to 30W (PoE+)
IEEE 802.3az Energy Efficient Ethernet (EEE)
IEEE 802.3bt Power over Ethernet up to 90W (PoE++)
IEEE 802.3bz 2.5GBASE-T and 5GBASE-T ("multi-gigabit")
IEEE 802.3u 100BASE-X

IEEE 802.3x Flow control - full-duplex operation
IEEE 802.3z 1000BASE-X

IPv4 Features

RFC 768   User Datagram Protocol (UDP)
RFC 791   Internet Protocol (IP)
RFC 792   Internet Control Message Protocol (ICMP)
RFC 793   Transmission Control Protocol (TCP)
RFC 826   Address Resolution Protocol (ARP)
RFC 894   Standard for the transmission of IP datagrams over Ethernet networks
RFC 919   Broadcasting Internet datagrams
RFC 922   Broadcasting Internet datagrams in the presence of subnets
RFC 932   Subnetwork addressing scheme
RFC 950   Internet standard subnetting procedure
RFC 951   Bootstrap Protocol (BootP)
RFC 1027   Proxy ARP
RFC 1035   DNS client
RFC 1042   Standard for the transmission of IP datagrams over IEEE 802 networks
RFC 1071   Computing the Internet checksum
RFC 1122   Internet host requirements
RFC 1191   Path MTU discovery
RFC 1256   ICMP router discovery messages
RFC 1518   An architecture for IP address allocation with CIDR
RFC 1519   Classless Inter-Domain Routing (CIDR)
RFC 1542   Clarifications and extensions for BootP
RFC 1591   Domain Name System (DNS)
RFC 1812   Requirements for IPv4 routers
RFC 1918   IP addressing
RFC 2581   TCP congestion control

IPv6 Features

RFC 1981   Path MTU discovery for IPv6
RFC 2460   IPv6 specification
RFC 2464   Transmission of IPv6 packets over Ethernet networks
RFC 2711   IPv6 router alert option
RFC 3484   Default address selection for IPv6
RFC 3587   IPv6 global unicast address format
RFC 3596   DNS extensions to support IPv6
RFC 4007   IPv6 scoped address architecture
RFC 4193   Unique local IPv6 unicast addresses
RFC 4213   Transition mechanisms for IPv6 hosts and routers
RFC 4291   IPv6 addressing architecture
RFC 4443   Internet Control Message Protocol (ICMPv6)
RFC 4861   Neighbor discovery for IPv6
RFC 4862   IPv6 Stateless Address Auto-Configuration (SLAAC)
RFC 5014   IPv6 socket API for source address selection
RFC 5095   Deprecation of type 0 routing headers in IPv6
RFC 5175   IPv6 Router Advertisement (RA) flags option
RFC 6105   IPv6 Router Advertisement (RA) guard

Management

AT Enterprise MIB including AMF MIB and SNMP traps
Optical DDM MIB
SNMPv1, v2c and v3
IEEE 802.1AB Link Layer Discovery Protocol (LLDP)
RFC 1155   Structure and identification of management information for TCP/IP-based Internets
RFC 1157   Simple Network Management Protocol (SNMP)
RFC 1212   Concise MIB definitions
RFC 1213   MIB for network management of TCP/IP-based Internets: MIB-II
RFC 1215   Convention for defining traps for use with the SNMP
RFC 1227   SNMP MUX protocol and MIB
RFC 1239   Standard MIB
RFC 1724   RIPv2 MIB extension
RFC 2578   Structure of Management Information v2 (SMIv2)
RFC 2579   Textual conventions for SMIv2
RFC 2580   Conformance statements for SMIv2

RFC 2674   Definitions of managed objects for bridges with traffic classes, multicast filtering and VLAN extensions
RFC 2741   Agent extensibility (AgentX) protocol
RFC 2787   Definitions of managed objects for VRRP
RFC 2819   RMON MIB (groups 1,2,3 and 9)
RFC 2863   Interfaces group MIB
RFC 3176   sFlow: a method for monitoring traffic in switched and routed networks
RFC 3411   An architecture for describing SNMP management frameworks
RFC 3412   Message processing and dispatching for the SNMP
RFC 3413   SNMP applications
RFC 3414   User-based Security Model (USM) for SNMPv3
RFC 3415   View-based Access Control Model (VACM) for SNMP
RFC 3416   Version 2 of the protocol operations for the SNMP
RFC 3417   Transport mappings for the SNMP
RFC 3418   MIB for SNMP
RFC 3621   Power over Ethernet (PoE) MIB
RFC 3635   Definitions of managed objects for the Ethernet-like interface types
RFC 3636   IEEE 802.3 MAU MIB
RFC 4022   MIB for the Transmission Control Protocol (TCP)
RFC 4113   MIB for the User Datagram Protocol (UDP)
RFC 4188   Definitions of managed objects for bridges
RFC 4292   IP forwarding table MIB
RFC 4293   MIB for the Internet Protocol (IP)
RFC 4318   Definitions of managed objects for bridges with RSTP
RFC 4502   RMON 2
RFC 4560   Definitions of managed objects for remote ping, traceroute and lookup operations
RFC 5424   The Syslog protocol
RFC 6527   Definitions of managed objects for VRRPv3

Multicast Support

Bootstrap Router (BSR) mechanism for PIM-SM
IGMP query solicitation
IGMP snooping (IGMPv1, v2 and v3)
IGMP snooping fast-leave
IGMP/MLD multicast forwarding (IGMP/MLD proxy)
MLD snooping (MLDv1 and v2)
PIM and PIM SSM for IPv6
RFC 1112   Host extensions for IP multicasting (IGMPv1)
RFC 2236   Internet Group Management Protocol v2 (IGMPv2)
RFC 2710   Multicast Listener Discovery (MLD) for IPv6
RFC 2715   Interoperability rules for multicast routing protocols
RFC 3306   Unicast-prefix-based IPv6 multicast addresses
RFC 3376   IGMPv3
RFC 3810   Multicast Listener Discovery v2 (MLDv2) for IPv6
RFC 3956   Embedding the Rendezvous Point (RP) address in an IPv6 multicast address
RFC 3973   PIM Dense Mode (DM)
RFC 4541   IGMP and MLD snooping switches
RFC 4601   Protocol Independent Multicast - Sparse Mode (PIM-SM): protocol specification (revised)
RFC 4604   Using IGMPv3 and MLDv2 for source-specific multicast
RFC 4607   Source-specific multicast for IP

Open Shortest Path First (OSPF)

OSPF link-local signaling
OSPF MD5 authentication
Out-of-band LSDB resync
RFC 1245   OSPF protocol analysis
RFC 1246   Experience with the OSPF protocol
RFC 1370   Applicability statement for OSPF
RFC 1765   OSPF database overflow
RFC 2328   OSPFv2
RFC 2370   OSPF opaque LSA option
RFC 2740   OSPFv3 for IPv6

RFC 3101	OSPF Not-So-Stubby Area (NSSA) option
RFC 3509	Alternative implementations of OSPF area border routers
RFC 3623	Graceful OSPF restart
RFC 3630	Traffic engineering extensions to OSPF
RFC 4552	Authentication/confidentiality for OSPFv3
RFC 5329	Traffic engineering extensions to OSPFv3
RFC 5340	OSPFv3 for IPv6 (partial support)

Quality of Service (QoS)

IEEE 802.1p	Priority tagging
RFC 2211	Specification of the controlled-load network element service
RFC 2474	DiffServ precedence for eight queues/port
RFC 2475	DiffServ architecture
RFC 2597	DiffServ Assured Forwarding (AF)
RFC 2697	A single-rate three-color marker
RFC 2698	A two-rate three-color marker
RFC 3246	DiffServ Expedited Forwarding (EF)

Resiliency Features

ITU-T G.8023 / Y.1344 Ethernet Ring Protection Switching (ERPS)
IEEE 802.1ag CFM Continuity Check Protocol (CCP)
IEEE 802.1AX Link aggregation (static and LACP)
IEEE 802.1D MAC bridges
IEEE 802.1s Multiple Spanning Tree Protocol (MSTP)
IEEE 802.1w Rapid Spanning Tree Protocol (RSTP)
IEEE 802.3ad Static and dynamic link aggregation

RFC 5798	Virtual Router Redundancy Protocol version 3 (VRRPv3) for IPv4 and IPv6

Routing Information Protocol (RIP)

RFC 1058	Routing Information Protocol (RIP)
RFC 2080	RIPng for IPv6
RFC 2081	RIPng protocol applicability statement
RFC 2082	RIP-2 MD5 authentication
RFC 2453	RIPv2

Security Features

SSH remote login
SSLv2 and SSLv3
TACACS+ Accounting, Authentication and Authorization (AAA)
IEEE 802.1X Authentication protocols (TLS, TTLS, PEAP and MD5)
IEEE 802.1X Multi-supplicant authentication
IEEE 802.1X Port-based network access control

RFC 2560	X.509 Online Certificate Status Protocol (OCSP)
RFC 2818	HTTP over TLS ("HTTPS")
RFC 2865	RADIUS authentication
RFC 2866	RADIUS accounting
RFC 2868	RADIUS attributes for tunnel protocol support
RFC 2986	PKCS #10: certification request syntax specification v1.7
RFC 3546	Transport Layer Security (TLS) extensions
RFC 3579	RADIUS support for Extensible Authentication Protocol (EAP)
RFC 3580	IEEE 802.1x RADIUS usage guidelines
RFC 3748	PPP Extensible Authentication Protocol (EAP)
RFC 4251	Secure Shell (SSHv2) protocol architecture
RFC 4252	Secure Shell (SSHv2) authentication protocol
RFC 4253	Secure Shell (SSHv2) transport layer protocol
RFC 4254	Secure Shell (SSHv2) connection protocol
RFC 5246	Transport Layer Security (TLS) v1.2
RFC 5280	X.509 certificate and Certificate Revocation List (CRL) profile
RFC 5425	Transport Layer Security (TLS) transport mapping for Syslog
RFC 5656	Elliptic curve algorithm integration for SSH
RFC 6125	Domain-based application service identity within PKI using X.509 certificates with TLS
RFC 6614	Transport Layer Security (TLS) encryption for RADIUS
RFC 6668	SHA-2 data integrity verification for SSH

Services

RFC 854	Telnet protocol specification
RFC 855	Telnet option specifications
RFC 857	Telnet echo option
RFC 858	Telnet suppress go ahead option
RFC 1091	Telnet terminal-type option
RFC 1350	Trivial File Transfer Protocol (TFTP)
RFC 1985	SMTP service extension
RFC 2049	MIME
RFC 2131	DHCPv4 (server, relay and client)
RFC 2132	DHCP options and BootP vendor extensions
RFC 2616	Hypertext Transfer Protocol - HTTP/1.1
RFC 2821	Simple Mail Transfer Protocol (SMTP)
RFC 2822	Internet message format
RFC 3046	DHCP relay agent information option (DHCP option 82)
RFC 3315	DHCPv6 (server, relay and client)
RFC 3633	IPv6 prefix options for DHCPv6
RFC 3646	DNS configuration options for DHCPv6
RFC 3993	Subscriber-ID suboption for DHCP relay agent option

VLAN Support

Generic VLAN Registration Protocol (GVRP)
IEEE 802.1ad Provider bridges (VLAN stacking, Q-in-Q)
IEEE 802.1Q Virtual LAN (VLAN) bridges
IEEE 802.1v VLAN classification by protocol and port
IEEE 802.3ac VLAN tagging

Voice over IP (VoIP)

LLDP-MED ANSI/TIA-1057
Voice VLAN

RFC 4330	Simple Network Time Protocol (SNTP) version 4
RFC 5905	Network Time Protocol (NTP) version 4

Feature Licenses

NAME	DESCRIPTION	INCLUDES	STACK LICENSING
AT-FL-x530L-01	x530L premium license	▶ OSPFv2 (256 routes) ▶ BGP4 (256 routes) ▶ PIMv4-SM, DM and SSM v4 ▶ VLAN double tagging (Q-in-Q) ▶ RIPng (256 routes) ▶ OSPFv3 (256 routes) ▶ MLDv1/v2 ▶ PIM-SMv6/SSMv6 ▶ RADIUS-Full ▶ UDLD ▶ VLAN Translation	▶ One license per stack member
AT-FL-x530-AM20-1YR	AMF Master license	▶ AMF Master 20 nodes for 1 year	▶ One license per stack
AT-FL-x530-AM20-5YR	AMF Master license	▶ AMF Master 20 nodes for 5 years	▶ One license per stack
AT-FL-x53L-8032	ITU-T G.8032 license	▶ G.8032 ring protection ▶ Ethernet CFM	▶ One license per stack member
AT-FL-x53L-CPOE	Continuous PoE license	▶ Continuous PoE power	▶ One license per stack member
AT-FL-x53L-MSTK	Mixed Stacking license	▶ Stack x530L with x530 Series switches	▶ One license per stack member
AT-FL-x530L-OF13-1YR	OpenFlow license	▶ OpenFlow v1.3 (1250 entries) for 1 year	▶ Not supported on a stack
AT-FL-x530L-OF13-5YR	OpenFlow license	▶ OpenFlow v1.3 (1250 entries) for 5 years	▶ Not supported on a stack

Ordering Information

Where xx = 10 for US power cord
20 for no power cord
30 for UK power cord
40 for Australian power cord
50 for European power cord

Switches

19 inch rack-mount brackets included

AT-x530L-10GHXm-xx
8-port 100M/1/2.5/5G PoE++ stackable switch with 2 SFP+ ports and a single fixed power supply

AT-x530L-28GTX-xx
24-port 10/100/1000T stackable switch with 4 SFP+ ports and 2 fixed power supplies

AT-x530L-28GPX-xx
24-port 10/100/1000T PoE+ stackable switch with 4 SFP+ ports and 2 fixed power supplies

AT-x530L-52GTX-xx
48-port 10/100/1000T stackable switch with 4 SFP+ ports and 2 fixed power supplies

AT-x530L-52GPX-xx
48-port 10/100/1000T PoE+ stackable switch with 4 SFP+ ports and 2 fixed power supplies

x530L Series | Stackable Intelligent Layer-3 Switches

AT-RKMT-J15[3]
Rack mount shelf kit for x530L-10GHXm

AT-BRKT-J24
Wall mount kit for x530L-10GHXm

AT-BRKT-J22
Wall-mount kit for x530L-28GTX & 52GTX

AT-VT-Kit3
Management Cable (USB to Serial Console)

10G SFP+ Modules

Any 10G SFP+ module or cable can be used for stacking with the front panel 10G ports

AT-SP10SR
10GSR 850 nm short-haul, 300 m with MMF

AT-SP10SR/I
10GSR 850 nm short-haul, 300 m with MMF industrial temperature

AT-SP10LRa/I
10GBASE-LR, 1310 nm, 10 km with SMF, I-Temp, TAA[4]

AT-SP10LR
10GLR 1310 nm medium-haul, 10 km with SMF

AT-SP10LR/I
10GLR 1310 nm medium-haul, 10 km with SMF industrial temperature

AT-SP10LR20/I
10GER 1310 nm long-haul, 20 km with SMF industrial temperature

AT-SP10ER40/I
10GER 1550 nm long-haul, 40 km with SMF industrial temperature

AT-SP10ZR80/I
10GER 1550 nm long-haul, 80 km with SMF industrial temperature

AT-SP10TM
10/100/1G/2.5G/5G/10G, 100m copper, TAA[4]

AT-SP10BD10/I-12
10G Bi-Di, 1270 nm TX/1330 nm RX, 10km, industrial temperature, TAA[4]

AT-SP10BD10/I-13
10G Bi-Di, 1330 nm TX/1270 nm RX, 10km, industrial temperature, TAA[4]

AT-SP10BD20-12
10G Bi-Di, 1270 nm TX/1330 nm RX, 20km, TAA[4]

AT-SP10BD20-13
10G Bi-Di, 1330 nm TX/1270 nm RX, 20km, TAA[4]

AT-SP10BD40/I-12
10G Bi-Di, 1270 nm TX/1330 nm RX, 40km, industrial temperature, TAA[4]

AT-SP10BD40/I-13
10G Bi-Di, 1330 nm TX/1270 nm RX, 40km, industrial temperature, TAA[4]

AT-SP10TW1
1 meter SFP+ direct attach cable

AT-SP10TW3
3 meter SFP+ direct attach cable

1000Mbps SFP Modules

AT-SPSX
1000SX GbE multi-mode 850 nm fiber up to 550 m

AT-SPSX/I
1000SX GbE multi-mode 850 nm fiber up to 550 m industrial temperature

AT-SPEX
1000X GbE multi-mode 1310 nm fiber up to 2 km

AT-SPLX10a
1000LX GbE single-mode 1310 nm fiber up to 10 km

AT-SPLX10/I
1000LX GbE single-mode 1310 nm fiber up to 10 km, industrial temperature

AT-SPBD10-13
1000LX (LC) GbE Bi-Di (1310 nm Tx, 1490 nm Rx) fiber up to 10 km

AT-SPBD10-14
1000LX (LC) GbE Bi-Di (1490 nm Tx, 1310 nm Rx) fiber up to 10 km

AT-SPBD40-13/I
1000LX (LC) GbE single-mode Bi-Di (1310 nm Tx, 1490 nm Rx) fiber up to 40 km, industrial temperature

AT-SPBD40-14/I
1000LX (LC) GbE single-mode Bi-Di (1490 nm Tx, 1310 nm Rx) fiber up to 40 km, industrial temperature

AT-SPLX40
1000LX GbE single-mode 1310 nm fiber up to 40 km
